

After you finalize your architecture, copy the entire content below and paste it as *** PDF *** in your project report Word file. The PDF version retains the diagram quality even if it is zoomed in many times.

Modify this file to specify your app's architecture.

Show which APIs you call from the Business Tier. Use of APIs adds the Service-Oriented Architecture (SOA) at the back end.

VolunteerCloud Cloud Software Application Java EE Client-Server Architecture

Server Operating System: CentOS Linux
